-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

***Drawings***

1. The following informality has been noted and requires correction in response to this Office Action. Since figures must be numbered separately, i.e. "Figure 1A," "Figure 1B," etc., Applicant is required to amend the Brief Description of the Drawings in Applicant's disclosure accordingly to reflect the proper figure designations which are in formal drawings when drawings are submitted.

***Claim objections***

2. All claims are objected to because of the following informalities: every claim is to begin with an Arabic number (i.e. 1, 2, 3,...) and end with a period. Appropriate correction is required.

***Claim Rejections - 35 USC § 112, second paragraph***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3694

4. Claims 1, and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 (The first sentence in the claims section) does not state how personal computers and credit/bank cards would be linked. Claim 2 (The second sentence in the claims section) does not limit itself to anything because if a claim is not limited to the only thing described in it there is no claim. Clarification and/or correction are required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lum (U.S. Patent 6,312,175 B1). For examination purposes I have assumed that you were claiming the addition of a credit/bank card reader to standard computer peripherals such as the monitor, keyboard, CPU, or independent attachment present in your drawing.

Art Unit: 3694

Lum teaches having a magnetic scanner, and/or smartcard scanner as part of a computer keyboard. (See *Column 3 Lines 21-30 and Figures 1A-2C.*)
